Have you ever had surgery for
Urinary Incontinence (SUI)? Prolapse? Hernia? Leakage?

Have you ever had surgery for
Urinary Incontinence (SUI)? Prolapse? Hernia? Leakage?

What did they use?

Tape, sling, tvt, tvt-o, hammock, gauze, graft, polypropylene, mesh implant?
(common names used for the medical device/implant)

What did they use?

Tape, sling, tvt, tvt-o, hammock, gauze, graft, polypropylene, mesh implant?
(common names used for the medical device/implant)

Do you suffer from:

- Recurrent urinary tract infections (UTIs)?
- Pain or problems urinating/voiding or having sex?
- Acute or chronic pain in pelvis, groin or legs?
- Unexplained systemic or autoimmune problems?
- Allergic sensitivities developed since surgery?
- Feeling sluggish or low mood for no apparent reason?
- Digestive problems?
- Heavy feeling, bulging or red/inflamed skin around the implant area?
- Simply just not yourself these days?
